“ We love you Sal. You and that gorgeous smile will be greatly missed cuz! As unfortunate as it was to come together as a family again thru your illness, it has been a blessing to reunite with so many loved ones. Only God knows the plans He has set out for our lives and I believe that part of your plan was to bring us all together again after so many years. What a testimony your life has been to have touched so many people. I only pray that God would allow me an ounce of an opportunity like that. Thank you for the memories you and your family created with Ygnacio and his. He remembers you fondly and always. Although it's sad to know you are no longer here on earth with us, we rejoice in knowing that you are in God's 🎵 big big house with lots and lots a rooms...and a big big table with lots and lots of food...a big big yard where you can play football...a big big house...it's your Father's house!! 🎵 We LOVE YOU SAL!!!!

“ Yo quisiera saber quien es el hijo de puta denivioso que ha hablado tanta mierda d mi padre que si contrabando de personas y que si tiene que ver con los zetas para hablar de el hay q lavarse la boca cualquiera q haya escrito eso que tenga los pantalones de decir quien fue a ver si es hombre aunque lo dudo porque los hombres no estan en el chisme ni se dedican a ver la vida de los demas. A quien le moleste que mi padre no tenga que escribir mentiras y bretes para ganarse la vida lo siento. Y estoy en miami porque me da la gana a mi de estudiar aqui y tengo un BMW como lo puede tener cualquiera. Y por ultimo me cago en ti y en tu madre que no te ensef1o lo que significa la palabra MORAL.

“ It isn't Kahn himself that is the lprboem. It is the members of the public who claim that his Youtube videos are the future of education. Sorry, but videos and audio recordings like his have been used as accessories to education for decades. He is providing a good resource, and should be commended for it, but the use of videos like his as a primary source of education is not supported by educational research. I've reviewed some of his physics videos. It's all about the equations and definitions it goes completely against the results of 40 years of physics education research. Great for review, great as a component of learning after fundamentals have been established and (in physics anyway) you know where the equations come from, but it is not a replacement or a sign of the future of education'. It's another in a growing body of decent secondary sources for education.

“ *The Johnson Family sends sincere sympathy to Sal's family. Sal's impact on the lives of so many people will long be remembered. I remember him as a boy and a young man growing up and attending school at Kelton. He was a good young man with a great heart. I shall always miss him and cherish his memory in my heart.*
